3. Between 2 and 15 July, the following railroad coal stocks, expressed in daily requirements, were available:

Date in July	Daily Requirements
2	4,2
3 and 4	4,5
5	4,9
6	4,9

Comment. Compared to the last reported status of 30 June 1954, railroad coal stocks available on 17 July increased by 1.8 days' requirements. Total coal stocks were still inadequate for large-scale transport operations.

Comment. As 52,100 tons of hard coal represent 78,150 tons of briquette units, total coal stocks for use by locomotives available on 17 July amounted to 128,950 tons of briquette units. Hard coal stocks amounted to 60 percent of total coal stocks. A comparison of the recorded figures to paragraph 1 of the present report indicates that the daily coal consumption quota was 20,148 tons (briquette units).
